**A Boy's Death.**  
A boy of twelve years old made a wager that he could successfully imitate the style of any living or dead poet and so it so thoroughly that the difference was not discernible and that the public, the press and the critics would not detect the fraud. The boy was named "Whitney and Co." who he signed "F. B. Whitney" was a publication known as the "Ottawa Letter." It described an engineer who took his trip through the mountains in the Barren, died at his post. From the Ottawa Letter the "F. B. Whitney" was a full page in *London's Weekly*, with a portrait of the boy, and described as "the best short poem of the decade." It was many pages before Mr. Harcourt discovered its authorship. The poem has also been incorporated in several books of poetry, including *Whitney's* from London's Weekly to death being a real masterpiece of verse, with 130 pounds of steam up and two cords of wet wood ready.

**Writing.**  
He read the letter twice and then said, "This is one of the most moving pieces of literature I ever saw." It was an appeal for aid" said his wife.

**Wife.** It was a note from the husband saying he had missed the train.

## What Soor Loan Was

"One of the Most Reckless Arrangements Ever Made."

Premier Whitney, With Now Inside Knowledge, In Above Words, Characterized Mr. Harcourt's Attempt to Claim Credit For Justification of Confidence of Late Government—Province Prepared to Maintain Honor of Province.

Toronto, May 2.—In the House yesterday, Hon. Mr. Matthews made the following statement:

"In the matter of the loan commonly known as the 'Soor Loan'—a five-hour Tuesday night May 1st, about 20 years ago, when the name from Ottawa, was found lying on the sidewalk on May 1st, at 10 o'clock, Tuesday night, the name was 'Whitney and Co.' who he signed 'F. B. Whitney' was a publication known as the 'Ottawa Letter.' It described an engineer who took his trip through the mountains in the Barren, died at his post. From the Ottawa Letter the 'F. B. Whitney' was a full page in *London's Weekly*, with a portrait of the boy, and described as 'the best short poem of the decade.' It was many pages before Mr. Harcourt discovered its authorship. London, May 2.—The Postal Union conference at Rome has rejected the proposal of universal postal postage.

**Mr. Hendrie Linton.**  
Hamilton, May 2.—The condition of William Hendrie, Sr., remains unchanged.

"After negotiations it was agreed that the province should release one-half of the collateral securities, being a portion of the bonds, income bonds and stock of the Lake Superior Corporation, and the Canadian Improvement Co. secured a loan for \$1,250,000 without the guarantee of the province."

**Guarantee Renewed.**  
"It being found that the further sum of \$1,000,000 required could not be obtained without the guarantee of the province, the Government, under authority of the act passed during the present session, guaranteed certificates for \$1,000,000, payable with interest at the rate of 8 per cent. per annum in six months from May 1, in renewal of one-half of the former certificates, and on these the Canadian Improvement Co. obtained a loan of \$1,000,000."

The whole of this \$1,000,000 principal and \$400,000 interest was paid into the Meriton Trust Co. on May 1. The Government's present liability is on general certificates of the Canadian Improvement Co. for \$1,000,000, payable with interest at 8 per cent. per annum on May 1, next, at the office of the Meriton Trust Co. and for the guarantee the Meriton Trust Co. hold a safe security for the province. The price of securities, being all the stock and bonds of the Atlantic and Montreal Railway and the mortgage on the assets of the company, and the whole of the "collateral securities" formerly held, being \$1,250,000 bonds of the Lake Superior Corporation out of

## School Suits

Getting the Boys ready for school—isn't it a great and perplexing problem? It's apt to make the pocket-belt wobble overtime.

To be sure the average healthy boy, while he does on a neat suit, also unconsciously takes pleasure in knocking the spots out of that suit as soon as possible.

However, it is common house talk that our Boys' Clothes wear longer and withstand all sorts of Boyish frolics better than any other Boy's Clothes sold anywhere hereabouts.

Will do wonders here in procuring School suit satisfaction for both parents and boys.

## CURIOUS PROBLEM.

The famous trembling pillar at Helicon presents a curious problem to architects.

The Church of St. Nicolas is surrounded with pillars constructed to prevent the walls from straining.

On one of the pillars in this tower, the famous trembling pillar dropped. When this pillar was found to be cracked, the architect immediately ordered it to be removed.

It goes and returns about seven inches on each side, causing the base of the pillar to be immovable, and the stones which support it to be in a constant state of vibration.

It seems like a solid piece of stone. The architect has been unable to find a satisfactory solution of the peculiarity of the pillar.

The architect has written: "What is very singular is that, although the pillar is about the same distance from the ground as any other pillar, it has no effect on it. The other may be moved by the wind, but this pillar is not."

It is the same question there was a striped base weighing about a pound and a half, and it was found to be attached at the top by the fangs.

Finally the dentist pointed out that the fangs were cut off with a pair of sharp forceps, and the animal was made to swallow the part of the fish.

At first the fish was very much alarmed, but after a few minutes it became calm and one or two more it couldn't help but swallow.

Says I to Susan Simpkins, in a friendly sort of way. As we jogged along the track, one pleasant summer day, I have thought the matter over. And as far as I can see, you are the winner. That is just the case of me.

I was rich and Susan poor, for I owned a farm and acre. I owned a trust of timber-land. A sawmill and a grist mill. While Susan earned her living as a hired girl and a washer. And I was very rich.

But Susan, she was thrifty. And she plumped and dried and, that winter, she was very rich. Any finer anywhere. Of course, Susan was equal. And her station wasn't mine. But as Mrs. Hiram Higgins said, she would have a home to share.

Then Susan Simpkins smiled. And she looked into my eyes. Without a sign of tears. Or natural sympathy. "I'm sure I'll come to you," she said. "I'm sure I'll come to you."

It ought to be remembered that the Boston Herald has just been published for use in the Presbyterian Church. It is the first of the kind ever attempted, and a special committee headed by Dr. Henry Van Dyke has been at work on it for three years.

Another Canadian has come to the front, John Tucker Murray, of Halifax. He is a member of the University, N.S., has just won the Hopper Fellowship at Harvard University, and is the largest travelling fellowship given at Harvard. Mr. Murray is the first to hold it.

They are "elgisms" in a strange head, who have come to us now coming to our shores, and are sure they must be almost everywhere. They are a sort of stop-fermentation and localities. When we see them wandering about our unfamiliar streets, we cannot help wishing that fortune will be very kind to them.

The supporters of Hamilton in France are becoming fewer and fewer. One of the candidates for the French Republic in Paris, a certain M. Grelot-Bou, a Corsican, connected by blood with the Bonaparte family, frankly avowed his Bonapartist principles. He received four voices at the general election on Sunday last out of more than thirty thousand.

Preparations are already in progress for the celebration of the Quebec for the sixtieth anniversary of the foundation of that city by Champlain. It is desirable that no historic event should be fittingly observed. The foundation of Quebec was one of those great events which mark the march of civilization and the growth of the continent.

It is a fact that the people of this world are not yet fully civilized. They are still in the New World where the need was seen, which has been such an unsatisfactory result as the celebration of the tricentenary should underline have the support and sympathy of all Canada, and indeed of North America.

The University of Paris is one of the most cosmopolitan in the world. Of the 14,000 students in the university, 1,000 or more are foreigners. There are nearly a thousand students from the United States, and many from other countries. They are a few American students, and many from other countries.

A vessel is now being built at Beaulieu, for the season of 1907, that would take the Great Lakes navigator of fifty years ago to sail the sea with the wonder of modern times. The ship, which is to be named "The Argosy," is the largest of the kind ever built.

Mr. Ross and His Political Friends.

For Mr. Ross with all his faults, says the London Free Press, he was at his party with a courage and fidelity, that deserves more honor than apparently he is at present receiving. It is rather a sad thing to see that of the million brood of politicians hanging for his empty chair each trying on the crown that the veteran has worn bravely, excepting his light, through stress and storm which would have borne down many a weaker man.

They are now clamorous for a new candidate for the premiership. The word is, away with him! The immediate cause is that he failed to get the Black Tower. But what can any one of the crowd now expect, after such a long career? The first place in the party councils have done better than he did in that particular case. Not one of them is it that altogether, but the desire to throw over the man who failed in the fight.

It is perhaps a just return, after the long campaign, that for the same hand. After his fall in 1894 a Cretan was held in Ottawa, regarding the shipwreck. The cry was that the party must not let a man who could "win victories" go to the lot of Mr. Cretan. He was the man who had been the official man of his department. The cry was broken under the blow.

Mr. Edward Blake put on the crown which had been there duly chosen. How the haughty gained the new leader and his summary mode of dealing with the opposition.

What is now reported from Toronto regarding Ross is in disagreement with the proceedings of the "old guard." When Sir John Macdonald was beaten, horse, foot and cart, in 1874, he was not thus treated, but the old guard rolled around him with the parties, still friendless hand, to carry on the war with what resources remained.

What may strike the stranger is that, Ross stood true to his party after he had been elected. He was not broken under the blow. He was not broken under the blow. He was not broken under the blow.

President Harrison of Ohio College, N. Y., says that after the age of 50 the human brain loses the power of original thought. It was good of him to admit that a young man may continue to be a great thinker for a few years after he leaves college.

Ottawa Journal: Parrot: Why was William Macdonald resigned the office of Postmaster-General because the duties placed upon him were too many for so many to be light-weight?

Nobody thought so, old man. A few Grits pretended they thought so. That is different.

Cures Rheumatism

"I had an attack of Rheumatism—pain near my heart—which increased to such a degree that I could not walk, and my appetite, and an intense itching or burning of the skin, made life miserable. I asked a doctor, and he told me to take 'Abney's Salt' and he said it was the only thing that would cure me, and he said 'I have seen it cure many others.' I did so, and can now cure positively, and without suffering. The Rheumatism has disappeared—my appetite is a grand—and I am feeling as well as ever."

Outlook is Bright For Conservatives.

It is the most pessimistic member of the party must have been of some those days and reflect that the political situation is day by day growing more satisfactory to the Conservatives. While the Whitney Government has disproved all the evil prophecies of its enemies, and in one season closed upon the Statute book nine pregnant legislation that its predecessors were wont to call "the worst of the worst," the legislative administration appears to be in a condition of day rest. The distinguishing feature of this session at Ottawa has been the surprising of misadventure resulting that largely as the career of a "Jingo" Government.

Contemplating upon the situation the Ottawa Outlook says: "The defeat of 1896 left the Tories very much to the cold, and it was not until the advent of the Whitney Government in Ontario that the staunch adherents of Conservatism began to heat again. They have watched with interest the inauguration of the policy of the new Government and the splendid results of the first two sessions have done much to re-establish the morale of the party throughout not only Ontario, but the whole country. The session just closed has proved a triumph in Provincial administration. The broad grasp of the necessities of the situation, the able and energetic manner in which measures fraught with the greatest advantage to the people have been drafted and carried through, the magnitude of aim for the welfare of the people, have commanded the respectful acquiescence in all quarters and awakened a real enthusiasm by its contrast with what the people have been used to for some time past in the administration of both Provincial and Dominion affairs. Mr. Whitney and his colleagues are recognized as able exponents of the men who make Conservatism a great power in the earlier history of Canada and the old Tory party will take heart and confidence that they have in the future the best of Mr. Whitney, who has been the most successful of the present session."

A DIFFERENCE IN LUNGS.

In the Edinburgh University three human lungs were examined by one of the best of the Eskimo and is now white.

In life, this would be ruddy with rich blood. Another is that of a coal miner and is black.

The other is of a town dweller and is a dirty slate grey, as are the lungs of the Eskimo residents. That's why consumption thrives in cities.

One reason why Scott's Emulsion does so much to keep down consumption is because it helps to keep the lungs in good condition.

### THE BUDGET SPEECH.

Mr. Mc. Fielding in One Hour Speech shadows a Big Loss—Terrible Changes Are Few.

Ottawa, May 22.—At the opening of the House yesterday afternoon, E. A. Kemp (Toronto East) drew a parallel with the American Insurance Committee, and said the way the Dominion Insurance Committee was a little easier.

Mr. Broder, who led the House at the moment, said he would confer with the Minister of Finance and the Minister of Budget and see if it could be so expedient.

The Budget speech.

Mr. Mc. Fielding broke a record yesterday, delivering the budget speech in little more than an hour.

He dwelt at some length on the increase in bank deposits, postal receipts and the like as proof of the country's prosperity.

He admitted that he had underestimated the expenditure of the year, but called a surplus of seven million dollars.

For the next year, ending June 30, 1906, he promised a surplus of twelve million dollars, of which \$500,000 is expected from the postoffice department.

"The public debt during the past year has increased five million dollars, and a deficit of \$500,000 is expected for the coming fiscal year (terminating), ending March 31, 1907."

He stated that the government, but rightly guided over, foresees a huge national debt. The Dominion Government.

### Agriculturists Learn New Things of Wheat and Clover.

Ontario Crop Bulletin For May Has Varying Reports From Correspondents of the Department—Best Reports From Lake Erie and Lake Ontario Counties—Quality and Cost of Labor Serious Problem.

Toronto, May 22.—The following information concerning the spring condition of agriculture in the province has been issued by the Ontario Department of Agriculture.

When the new fall wheat was reported on in November, it was described as having had a good start at seeding time, and the yield for that year was expected to be the best since 1902. However, the winter was so severe that the wheat was killed in many places, and the yield was expected to be the best since 1902.

Wheat in remarkably good form. Notwithstanding the many complaints of poor fields, there are many reports of good crops. The winter crops of wheat and fall wheat are in good form. Many reports are as to prospects.

Winter losses of orchard trees are smaller than for several years. In some quarters a number of old plum trees have been reported as having accounted for the loss of many trees. The loss of many trees has been reported as having accounted for the loss of many trees.

There has been a serious amount of blossoming on nearly all kinds of orchard trees, and should heavy rains keep off during the month of "maturing," a large fruit crop may be looked for. Considerable of the present of Lake Erie, the forest, but, and orchards will have to continue the good fight against them if the best results are to be had.

The open winter appears to have done little harm. There was sufficient snow of all kinds except corn. As many of the larvae of the various insects have been reported as having been killed by the cold, the winter has been a good one for the farmer.

## Murderer's Body Gone.

Mrs. Rosa Joyce is Dead, But  
Her Father Will Live.

Coroner's Jury Returns Verdict That Rosa Joyce, Wife  
of John Joyce, Came to Her Death By a Bullet Fired  
By Her Husband, and That He Died By a  
Wound Deliberately Inflicted By His  
Own Hand.

Kingston, May 28.—Mrs. Joyce, one of the Raitt shooting victims, died Sunday. Coroner's Jury returned its verdict that she was killed by a bullet fired by her husband, John Joyce.

The coroner's jury returned its verdict yesterday afternoon at Raitt's. They discovered that the body of John Joyce, the murderer, which they left in the house, was not there. Nothing can be learned as to where it is, but it may have been taken for anatomical purposes.

Having heard several witnesses, a verdict was rendered that Rosa Joyce came to her death by a bullet fired by the hand of her husband, John Joyce, and that the said John Joyce died by a wound deliberately inflicted by his own hand.

Mrs. Joyce's Aunt-Mother. In her autograph despatch to Coroner Russell, Mrs. Joyce declared that she had left her husband because he had "pounded her" on Thursday, as she had done every week before.

Her father's house early Saturday morning, and she had left her husband because he had "pounded her" on Thursday, as she had done every week before. She had left her husband because he had "pounded her" on Thursday, as she had done every week before.

St. John's N. B. May 28.—Daniel Klagen, a prominent business man of Chatham, N. B., committed suicide Sunday night by taking poison given. He died in terrible agony.

### TIMELY TOPICS.

There's no long run 'till you'll find me.

Away from the school; Where there ain't no grown folks

Down there at the swimmin' pool. For the very reason of the season; What'll support 'em 'till the fall; An' 'till the fall, 'till the fall.

"Come on in! 'till the water's great."

You can talk about your shakin' 'till the water's great; You can talk about your swimmin' 'till the water's great; You can describe the joys that wait 'em. But I'm givin' 'em 'till the water's great. That there's swimmin' 'till the water's great.

When you know 'till the water's great.

With a big two too & a dreser, An' 'till the water's great; When you ain't out of the clothes An' you know you can't be no swimmer; An' you ain't out of the clothes An' you know you can't be no swimmer.

"Come on in! 'till the water's great."

All swimmin' about the water's great. Here's a strain of the patriotism of the Anti-Vivisection Society.

The inquiry into the loss of the French naval ship which sank a fortnight ago with 100 or more of her company is proving nothing of special value, but it has served to bring out a story of remarkable swiftness on the part of the vessel's command.

The ship's new already under the command of the captain remained calm at his post smoking cigarettes. His shoes shined with his officers, saying "We may meet again in the next world."

The price of the board the cadet ship sunk driving a battleship.

### Living Beyond its Income.

The budget report delivered by Hon. Mr. Fielding in the Dominion House last week, demonstrated beyond a doubt that the Government is living beyond its income and has done so in several of the ten years since Mr. Wilfrid Laurier became premier. This is the more remarkable because the \$25,000,000 collected from the people \$25,000,000 in nine years, but which is \$10,000,000 more than the Government got out of the \$10,000,000, and has borrowed about \$5,000,000. This year Mr. Fielding says he expects to spend \$52,000,000, while \$45,000,000 was from ordinary sources.

The Finance Minister explained that the expenditure for the fiscal year 1905-06 was \$45,000,000 more than he had estimated in his last budget, though the year had closed when he made that incorrect statement. When the accounts were all in he had found that the \$5,000,000 surplus which he had expected had fallen to less than \$500,000.

As he has been said, the Government has completed a great public work, spending the ordinary services. Making allowance for development, the country must be paying more money than it is taking in.

A few days ago a member, speaking of one department, said it was doing well, meaning that no surplus or check was kept on payments, and that extravagance and plunder were the main features of administration.

This might be said of the Government generally.

There is the Yukon. The Government of that district cost last year \$1,000,000, while the revenue from gold royalties, customs, excise, and other sources was \$750,000. More than three-quarters of a million more was sent from outside to pay for the government of the \$250,000, leaving a balance of \$750,000 remaining in the Yukon. The Government collects \$100 a year from each miner, whereas in the Yukon district and then sends in another \$100 to pay the rest of the expense. It costs more in getting those \$200 people, now orderly and well organized, than it did five years ago, when there was between \$50,000 and \$100,000 inhabitants, including many lawless and desperate characters, and when the Yukon was producing \$750,000 in gold, whereas now it produces only \$500,000. The population of the Yukon is now that of a fair sized town, yet to government costs enough to run a populous province. It is thus very evident that the politicians who went in to intrude have instead given us a sample of the extravagance which cannot be condoned.

### KILLS CATARRHAL GERMS

BREATHES HYGIENE A FEW TIMES DAILY AND BE CURED—GOES RIGHT TO THE SPOT.

In treating catarrhal diseases, the first thing necessary is to kill all the germs which are the cause of the disease, to remove the mucus and to soothe the inflamed and raw parts of the throat.

The old folks should be kept young folks alone, values to country and the world of money or something.
